Subject: Dutch elm disease survey and tree inventory in 2019

Attention Diane Moss,

My name is Jeffery Gooliaff and I am inquiring into whether the Town of Maple Creek would be interested in receiving a proposal and quote for a proposed Dutch elm disease (DED) survey during the summer of 2019. KBM Resources Group has completed these surveys for communities across southern Saskatchewan since 2017 with 24 communities being surveyed during the summer of 2018. I have been involved in the management of this disease since 1999. Currently, DED is firmly established in the Moose Jaw area and because your community has a past history of DED within its boundaries this would be a great investment in the protection of your urban forest resource. This disease is only a short firewood shipment from getting established in your town

Also, we do complete tree inventories for communities and I am able to provide a proposal/quote for a public tree inventory upon request.

If you have questions about either service please don't hesitate to inquiry!

Thank you for your consideration of our services!

Sincerely,

jg

Jeffery Gooliaff
